Finding a National Register Nomination Using a CRGIS Map

NOTE: To learn how to map resources, refer to the [Map Tools Tutorial](#).

Historic properties listed in the National Register of Historic Places are denoted on a CRGIS map by the color blue. Individual resources – such as buildings and objects – may be symbolized by a **blue triangle**, while a larger resource – such as a historic district – will be symbolized by a **blue-bordered polygon**.

Clicking on a blue triangle or polygon on a map will open a CRGIS Report window for the relevant National Register listed historic resource. **CRGIS Reports windows**, such as the one seen below, are used to display information that identifies and describes historic resources.

Observations		
No Data Present		

National Register nomination forms are scanned and uploaded to the CRGIS, and will appear in the "Links" section of the report window. Click on the appropriate link to see the nomination form, photographs of the resource, a site plan/district map, a USGS Topographic Map showing the resource's location, or an inventory (for districts and large complexes). National Register forms are in .pdf format, and photographs are in .jpg format. Both can be downloaded from the CRGIS.

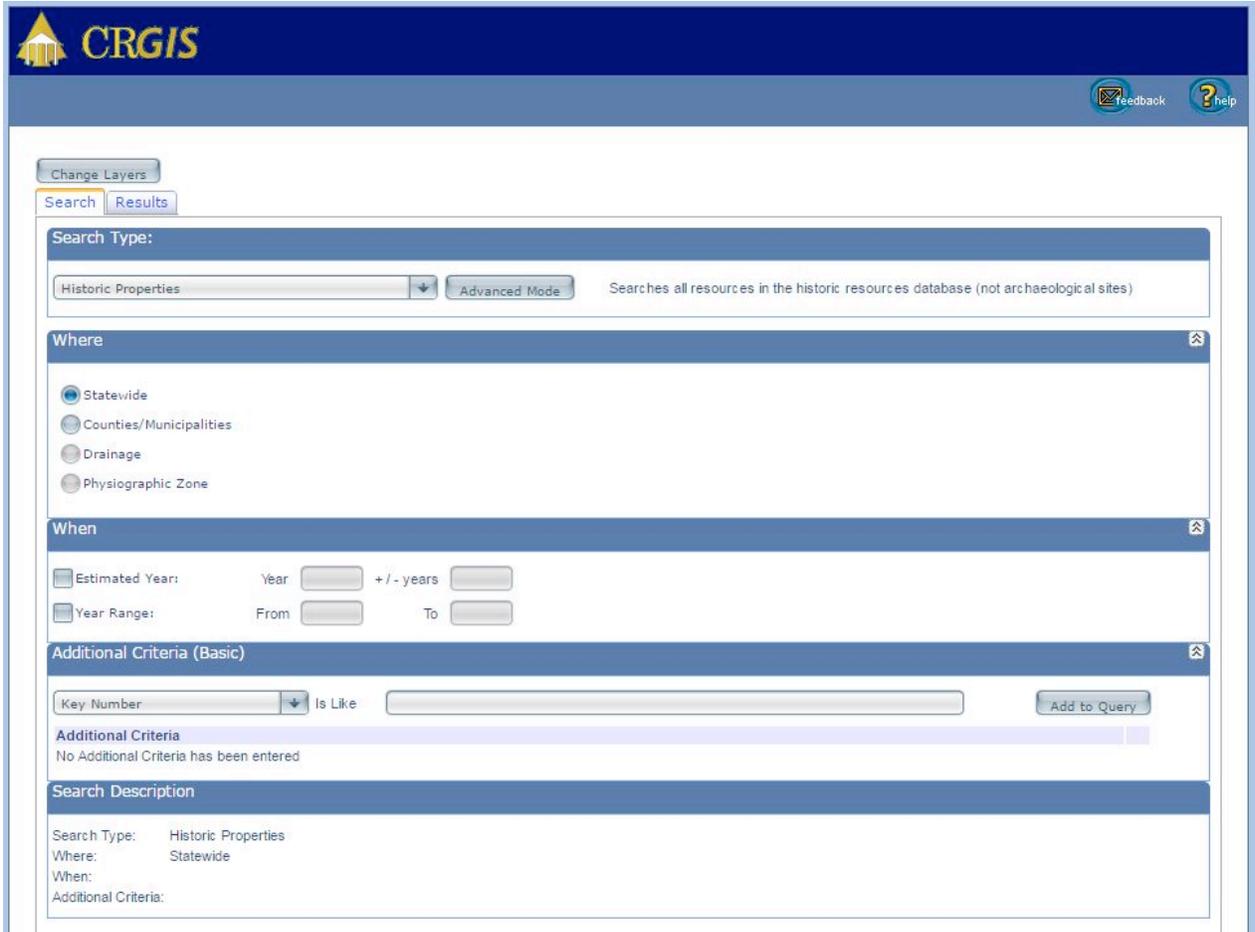

Finding a National Register Nomination using *AskReGIS*

NOTE: For information on how to use the *AskReGIS* search tool, refer to the [AskReGIS Tutorial](#).

For the purposes of this tutorial, search for the National Register listed resource Austin Dam, in Potter County. Open the "AskReGIS" Text-Based Search tool by navigating to the main CRGIS search page and clicking on the button near the bottom left-hand corner of the screen that reads "**AskReGIS.**"

Once the *AskReGIS* search tool has been opened, you will have the opportunity to narrow your search from “Statewide,” which is the default, to counties and municipalities. This is accomplished by selecting “**Counties/Municipalities**” from the “Where” section of the search tool.

After selecting the “Counties/Municipalities” button, a “Counties” box will appear to the right. Scroll down until you see “Potter,” and then click on it. After clicking on the county name, a box containing Potter County’s municipalities will appear. Find “Austin Borough” in the list, and click on it. Selections will be highlighted in gray. If you do not know which municipality the resource that you are looking for is in, simply leave the default “All Municipalities” highlighted, since selecting “All Municipalities” from the rightmost selection window will search the entire county.

Finding National Register Nominations in the CRGIS

Next, in the section entitled "Additional Criteria (Basic)," you will have the option to select "National Register Status" from the drop down menu on the left side of the screen.

Next, select "Listed" from the drop down list to the right. You must then click the "Add to Query" button on the right-hand side of the screen for your selections to be added to the search parameters.

Notice that as search criteria are added to the query, they will populate the "Search Description" section at the bottom of the *AskReGIS* window. When done, click the "Search" button that is located on the bottom right-hand side of the page. The screen will soon refresh with the results of your custom search.

Understanding Your AskReGIS Search Results

Our example search for National Register listed historic resources in Austin Borough, Potter County, has returned one search result – the Austin Dam.

The screenshot shows the CRGIS search results page. At the top, there is a search criteria box with the following information:

- Search Type: Historic Properties
- Where: Austin Borough
- When:
- Additional Criteria: National Register Status Includes Listed

Below the search criteria are several buttons: "Map All Non-Linear", "Map Selected", "Create New Layer", "View Selected List", and "Export to CSV".

The search results are displayed in a table with the following columns: Key Number, Inventory ID, Address, Municipality, and County. There is one result listed:

Key Number	Inventory ID	Address	Municipality	County
046777	46684		Austin Borough	Potter

At the bottom of the table, there is a "Records per page" dropdown set to 20 and a pagination control showing "Records: 1 - 1 of 1 - Pages: 1".

If your search returns more than one result, you are able to further identify which resource is the one you desire by examining the information provided in the list of search results. Click and drag the scroll bar on the bottom of the list to expose more information – like the "Primary Historic Name" - to confirm your selection.

This screenshot shows a detailed view of the search result for the Austin Dam. The table has the following columns: Municipality, County, Primary Historic Name, ER Number, and National Register Status. The data row is:

Municipality	County	Primary Historic Name	ER Number	National Register Status
Austin Borough	Potter	Austin Dam (Bayless Paper Mill & Dam)		Listed

At the bottom of the table, there is a "Records per page" dropdown set to 20 and a pagination control showing "Records: 1 - 1 of 1 - Pages: 1".

Finding National Register Nominations in the CRGIS

Once you have confirmed that your search has returned a result in which you are interested, click on the **purple information button** on the far left side of the search results list to open a CRGIS Report window.

National Register nomination forms are scanned and uploaded to the CRGIS, and will appear in the "Links" section of the CRGIS Report window. Click on the appropriate link to see the nomination form, photographs of the resource, a site plan/district map, a USGS Topographic Map showing the resource's location, or an inventory (for districts and large complexes.) National Register forms are in .pdf format, and photographs are in .jpg format. Both can be downloaded from the CRGIS.

This concludes CRGIS Tutorial #5: Finding National Register Nominations in the CRGIS.
