Total No. of Farms in Straban Twp = 146. The land in this Twp. is the same as the greater part in Mountpleasant, mostly a red sand changing some places to a yellow sand and in others to a dark blue soil, but the fertility remaining pretty much the same, although the yellow sand soil of this Twp. is by some supposed and I think is best adapted for wheat. The timber, stone, &c. pretty much the same as in Mountpleasant Twp. or as described in schedule No. 3. Principal fertilizers the same as in Mountpleasant Twp. lime and stable manure.
