

Isolated Find or Non-Site Collection Documentation

This form is used in two specific circumstances: to record **isolated diagnostic pre-contact artifacts**, **OR** to record **project assemblages that will be submitted to the State Museum for curation**, but do not meet any of the site criteria. If you are submitting a non-site collection, all finds from the same project report and within the same county should be included on a single form, and they will be assigned a single non-site collection number. Specimen numbers will indicate individual cluster locations and must be included in the electronic inventory. If the project spans multiple counties, submit one form for each county containing non-site finds. Maps submitted with this form must show the locations of all finds included in the submission and their designated specimen number.
