Summary
Users can print resource reports, results lists, and maps from CRGIS.

Resource Detail Report
Each resource details report has a printer icon in the upper right corner that can be used to print that report.

A Resource Details report is a pop up window in CRGIS that includes identification, historical, geographical, and administrative information about a historic resource recorded in CRGIS.

To print a Resource Detail report, click on the blue printer icon in the upper right corner of the box.

Results List
Results lists from AskReGIS or the spatial search can be printed by using the Export function found at the
To print a Results List from an AskReGIS search, click on the “Export to CSV” in the upper right corner of the box.

You will see a pop-up banner at the bottom of your screen asking if you want to open or save the search. The Results List will open as an Excel worksheet.
Maps

Maps can be printed by clicking on the gear in the box at the top of the map legend on the left side.

Select the Print Map option.

A pop up box will ask you a series of questions to set the print layout, define the print area, and printer.

This concludes the “How to Print from CRGIS” tutorial.
