How to Print from CRGIS

Summary

Users can print resource reports, results lists, and maps from CRGIS.

Resource Detail Report

Each resource details report has a printer icon in the upper right corner that can be used to print that report.

A Resource Details report is a pop up window in CRGIS that includes identification, historical, geographical, and administrative information about a historic resource recorded in CRGIS.

To print a Results List from an AskReGIS search, click on the “Export to CSV” in the upper right corner of the box.

Create New Layer View Selected List Export to CSV

11 results for 7 Historic Properties

Municipality	County
Harrisburg City	Dauphin
Harrisburg City	Dauphin

You will see a pop-up banner at the bottom of your screen asking if you want to open or save the search. The Results List will open as an Excel worksheet.

How to Print from CRGIS

Maps

Maps can be printed by clicking on the gear in the box at the top of the map legend on the left side.

Select the Print Map option.

A pop up box will ask you a series of questions to set the print layout, define the print area, and printer.

This concludes the “How to Print from CRGIS” tutorial.
