Total of all Farms in Mount Pleasant Twp = 151. The land is generally of a thin soil in this twp. excepting in the N.E. corner there is some of the very best red lined stone land, but this is only a very small part, the balance is a red sandy soil, very easily improved. Lime and manure had a powerful effect when applied and great improvements in agriculture have taken place within the last five years past in this twp. through living which is receiving more attention daily.
